

Gordian Okon

Backend Engineer | Fullstack Developer

Lagos, Nigeria | okongordian@gmail.com | 09019302620 | github.com/guardianprime

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with hands-on experience building scalable financial systems, RESTful APIs, transaction processing pipelines, and fullstack web applications using Node.js, TypeScript, NestJS, React, PostgreSQL, MongoDB, Prisma, and Supabase. Skilled in designing clean backend architectures, implementing automation systems, and developing performant user-focused applications.

TECHNICAL SKILLS

Backend	Node.js, Express.js, NestJS, TypeScript, REST APIs, Authentication, API Integrations
Frontend	React.js, Astro, TypeScript, JavaScript, Responsive UI Development
Databases	PostgreSQL, MongoDB, Supabase, Prisma ORM, Data Modeling
Tools	Git, GitHub, Docker, Postman, Linux CLI, PNPM

PROFESSIONAL EXPERIENCE

Backend Engineer — Trackly

- Designed and implemented scalable financial taxonomy systems connecting Transactions, Categories, and Groups.
- Built secure CRUD APIs and implemented protected category logic for financial workflows.
- Developed an automated transaction rules engine based on merchant names, amounts, and keywords.
- Implemented historical transaction rule persistence and automation workflows.
- Designed flexible transaction tagging systems using many-to-many database relationships.
- Built real-time budget aggregation services for spending analysis and reporting.
- Implemented transaction synchronization pipelines between Mono Transaction Metadata API and Supabase.
- Normalized and stored transaction records including amounts, dates, narrations, categories, and transaction types.
- Implemented automated transaction sync triggers on user login.

PERSONAL PROJECTS

Towello — Bayse Africa Hackathon Project

- Collaborated on a hackathon-driven solution focused on solving real-world user problems.
- Contributed to backend architecture, API development, and scalable feature implementation.
- Worked in a fast-paced engineering team to rapidly prototype and deploy product features.

Aby-Gadgets — Fullstack E-commerce Platform

- Built scalable REST APIs for authentication, product management, and order workflows.
- Developed responsive frontend interfaces using React and TypeScript.
- Implemented product catalog management and backend database operations.

Fullstack URL Shortener

- Developing a scalable URL shortener platform using React, Node.js, Express, and MongoDB.
- Implementing analytics, redirect tracking, and optimized API endpoints.

EDUCATION

AltSchool Africa

Diploma in Backend Development

ADDITIONAL INFORMATION

- Strong analytical and debugging skills
- Experience working in collaborative product teams
- Comfortable building scalable systems in fast-paced environments
- Passionate about backend engineering and software architecture
